

## SOUND PROOF DIVIDERS

Bi-Office Sound Proof Dividers are functional and lightweight elements that increase the acoustical comfort inside a room.

### EVOLUTION SOUND PROOF DIVIDERS

These acoustical barriers were specially designed to improve the working conditions in professional offices.

- Ideal solutions for wall, room and desk dividers
- Sound Absorbing Polyethylene Foam
- Triple Level Noise Absorption
  - Initial Dissipation: Sound energy is lost as soon as it hits the foam membrane
  - Perforation: Engineered perforations allows for viscous energy loss
  - Cavity Absorption: Air cavities effectively trap sound vibrations inside the cell walls
- Sustainable low-density PE (LDPE) material that can be recycled in LDPE recycling systems
